WATER AND SANITARY SEWER UTILITY FEES

Overview of the Water and Sanitary Sewer Extension Plan.

The City Council has established a comprehensive plan to install utilities in residential areas within the City limits that currently do not have these services. The cost to implement this plan is derived from water and sanitary sewer capital revenues, not property tax dollars. The City Council voted to require residents to pay approximately 25% of the construction costs at time of connection to cover the differential between identified City funds and the total estimated cost. The 25% cost to the resident is commonly referred to as the "Surcharge."

Note: The City of Warrenville does not require residents to connect to the water or sanitary sewer system.
